

## **Technical Data Sheet**

Page 1 of 2

**Properties:** 

AKEMI® Rust Remover Paste is a gel-like cleaning agent based on inorganic acids with non-ionic tensides and rust inhibitors. The product is free from hydrochloric acids. The tensides contained are biodegradable in correspondence with the legal regulations for tensides.

**Application Area:** 

AKEMI® Rust Remover is suitable for removing surface rust stains as well as rust stains caused by indwelling rust on acid-resistant natural and artificial stone. Occlusions in natural stone (granite, gneiss) which cause the rust are enveloped thus inhibiting the formation of new rust. On account of its gel-like consistency AKEMI® Rust Remover Paste is ideal for vertical surfaces such as façades and wall coverings. The use of AKEMI® Rust Remover in liquid form is recommended for floor coverings.

**Instructions for Use:** 

- 1. Apply undiluted with a solid brush or spatula to the absolutely dry stone surface. To avoid new rusting on untreated surfaces and changes in colour, apply to the complete stone surface.
- 2. Allow the product to work for up to 24 hours.
- 3. Avoid drying of treated surfaces, it is recommended to cover them with a plastic film.
- 4. Rinse thoroughly with water until any excess of the product has been taken off.
- 5. Repeat process on dry stone if necessary.
- 6. After the stone has been successfully treated, it is recommended to protect it with either AKEMI® Stone Impregnation or AKEMI® Stain Repellent products in order to prevent watery substances from penetrating into the stone as an additional measure against new rust.

**Special Notes:** 

- For professional use only.
- AKEMI® Rust Remover Paste damages calcareous stone and must therefore in no case be applied on polished marble, limestone, terrazzo, eloxal and enamel. If in doubt, test on an inconspicuous area.
- Before starting we recommend to prepare a sample area in order to evaluate the cleaning power and appearance of the treated object and to ascertain the material consumption as exactly as possible.
- Do not allow contact with plants, otherwise rinse immediately with water. Concentrated and diluted solutions must not be emptied in plantations.
- If the product is given a particularly long time to work, it may cause
  a slight darkening of the colour of some types of stone. This usually
  disappears if it is washed intensively several times using a lot of
  water with AKEMI<sup>®</sup> Stone Cleaner added to it.
- For proper waste disposal, the container must be completely emptied.
- Recycling in accordance with the guidelines of EU Decision 97/129 EC on the Packaging Directive 94/62/EC.

**Technical Data:** Coverage: approx. 0.25 - 0.5 m<sup>2</sup>/liter

Colour: milky yellow

Density: approx. 1.27 g/cm<sup>3</sup>

pH value: < '

**Storage:** If stored in dry and cool condition (5-25°C/41-77F) in its closed original

container at least 24 months from production.

TDS 12.23
